

# cobas c 513

# The affected settings

## Affected important setting

| Affected important settings   | Affected time                        |  |  |  |
|---|--------------------------------------|--|--|--|
| Sample probe 1 (S1) Clot Detection disabled (only active on system running Glucose) | next operation starting from Standby |  |  |  |

Table 1: Affected important setting

# Detectability

1. Date and Logon ID is not displayed in the red rectangles shown in figure 1.

Figure 1: Date and Logon ID (in the red rectangles) is not displayed on the User Interface

2. System alarm 471-000001 without alarm name occurs.

Figure 2: System alarm 471-000001 without alarm name

### Actions to be taken by the customer

Check if the date is displayed in the red rectangle shown in figure 1 before you click on the start button or at minimum on a daily basis. Whenever the date is not displayed, the software limitation has occurred on this instrument.

If the described software issue is present, stop the instrument by pressing the "Stop" button and call your Roche Service Representative.

For systems running in <u>sequence mode</u>, it is recommended to measure those samples again which have been measured in the time frame from the issue occurrence until the instrument has been stopped.

In order to determine the estimated time when the issue occurred, follow the steps as below.

- 1. Open the Print-History screen.
- 2. Search for the latest report which still displays the date in the red rectangle shown in figure 3. This is the estimated time before the issue occurred.

| Photosoter Check |        |            | Operator ID: | operator  |        |            | 10/11/201 | 4 11:48 |  |
|------------------|--------|------------|--------------|-----------|--------|------------|-----------|---------|--|
| Previous         | s Data |            |              | Current D |        |            |           |         |  |
|                  | Date   | 10/11/2014 | 10:13        |           | Date   | 10/11/2014 | - 1       | 1:48    |  |
|                  | 340 mm | 1000       |              |           | 340 nm |            | 1000      |         |  |
|                  | 376 mm | 500        |              |           | 376 nm |            | 500       |         |  |
|                  | 415 mm | 1000       |              |           | 415 nm |            | 1000      |         |  |

|                  | 700 mm | 1000       |              |           | 700 nm |            | 1000      |         |  |
|                  | 800 nm | 500        |              |           | 800 nm |            | 500       |         |  |

Figure 3: Report in Print- History

For systems running in barcode mode, there is no need to rerun the barcoded samples which have been measured in the time frame from the issue occurrence until the instrument has been stopped, except the samples registered under Workplace- Test Selection-Barcode Read Error.
