Affected Product: Epix® *latis*® Graspers

XX March 2020

Dear Valued Customer,

Applied Medical is conducting a voluntary recall of specific lot numbers of the Epix *latis* Grasper due to the potential for tissue to catch on a slightly protruding rivet on the distal end of the device, which may lead to tissue damage. Please note that not all devices in these lots are affected by this potential device defect. Applied has not received any reports of impairment or permanent injury related to tissue catching; however, out of an abundance of caution for patient safety and a commitment to provide only the highest quality products, Applied Medical has decided to recall all potentially affected units. We regret this inconvenience and assure you that maintaining high quality standards continues to be our highest priority.

All affected lots (see table) for models C4130 and C4140 of the Epix *latis* Graspers should be returned to Applied Medical.
